

Psychometric Research *GSR Meter*

The *GSR Meter* is a professional biofeedback monitor designed for hypnotherapy and psychotherapy. It measures the Galvanic Skin Response, giving the therapist near-instant feedback of the client's general state of relaxation and immediate emotional reactions.

Use of modern microprocessor technology has enabled us to produce a highly accurate device at a very reasonable cost.

Features:

- 2 year guarantee against faulty parts and manufacturing faults.
- Large, easy to read digital display.
- Switchable between 2 and 3 digit accuracy.
- Very low power consumption (typical battery life of 180 hours using a single 9V alkaline battery).
- Comfortable and unobtrusive velcro finger straps with high-conductivity copper electrodes.
- Long (2m), lightweight lead.
- Rugged protective rubber boot with built in tilt stand for convenient viewing angle.
- Rubber boot available in a variety of colours (black, orange, yellow, light blue and dark blue).
- Dimensions in mm 108W x 170H x 42D (not including tilt stand)
- Made in England.
